Hebrew

 Native

English

 Excellent

Computer Science Student, in my last year.

As part of my college assignments I participated in the following projects:

1. Dog4You – Project based on Java that designed to connect between potential adopters to dog shelters and making pets adoption easier and convenient.
2. Runners- Project based on Python which collected and analyzed data of runners and tried to predict the potential of their best results.
3. Oversee - project based on android, an app for sanitation inspectors
